

Dimitar Dimitrov

AUTOMATION QA ENGINEER

Profile

A friendly person who had finally found the field to pursue a career in. Always eager to help and willing to discuss matters with fellow team members to ensure the tasks are done well.

Technologies and tools: Java, RestAssured, Selenium WebDriver, TestNG, MySQL, Postman, JIRA, TestLink, Gradle, Groovy.

Employment History

Automation QA Engineer, Devrealm, Sofia

NOVEMBER 2018 – PRESENT

I have been part of a big project since its very beginning, responsible for:

- Creating End to End API tests, using REST Assured with Java;
- Creating Web tests using Selenium WebDriver with Java;
- Doing code reviews;
- Writing and executing manual test cases when necessary to assist the Manual QA team;
- Reporting and verifying defects;
- Assisting the developers (creating users, executing scenarios right away to check if fixes are successful, discussing product requirements etc.).

Manual QA, DataArt, Sofia

FEBRUARY 2018 – NOVEMBER 2018

- Won a position as a QA Intern after participating in the company's QA School, among 25 other applicants.
- Immediately assigned to a project helping a senior QA with his daily tasks while learning new skills (SQL, bug tracking, exploratory testing, requirement analysis etc.).
- Got a permanent position in May, but ended up without a project, so I decided to pursue a career as an Automation QA and started learning Java.

Customer Support & Shift Lead, GVC Group, Sofia

AUGUST 2014 – MAY 2017

- Provided support for the toughest customers
- Organized the workload among the associates on the shift
- Made a daily report for the Team Leaders
- Assisted the newcomers with their cases or any other work-related issues

Education

Bachelor of Arts in International Relations, UNWE, Sofia

SEPTEMBER 2007 – NOVEMBER 2011
